## THE STORY

My name is Buddy and I come from the BLUE PLANET. On this planet, there is lots of water and the sky is always a beautiful blue. My planet is only this colour: the trees are blue, the houses are blue, the animals are blue. I am here to find out if there are other colours in other parts of the universe besides my own. I bring my colour with me as a gift for all of you and lots of things to tell you about. Because I have already travelled a lot. I have a home on planet Earth, in XX. I live there with Alice and Bob who always take good care of me. I also have aunts who live with them, and they are the ones who accompany me on my adventures. I don't use a fork and spoon to eat like you do, but a magic thread that sticks to the wall.

Travelling so much, I've learned to say hello in many ways: ciao, salut, hola. Lots of children like you taught me! How wonderful and fun it is to learn new things from others! I get very excited every time I make new friends.
